

AMENDMENT TO THE SPECIFICATION

In the Specification:

Please replace the paragraph beginning on page 7, line 9 as follows:

In order to impart heat resistance, chemical resistance, and/or moisture permeation resistance, an inorganic protection layer 17 for planarizing the top surface of the organic EL portion 12 may be further provided on the second electrode. The protection layer 17 may be made of metal oxide, metal nitride or similar material.

Please replace the paragraph beginning on page 7, line 17 as follows:

The moisture-absorbing layer 14 may be a porous silica layer. The porous silica layer may have a thickness in the range of about 100 nm to about 50 ~~μm~~ in view of manufacturing process and performance.

Please add the following new paragraph on page 6, after line 2:

FIG. 6 is a cross-sectional view of an organic EL display device according to an exemplary embodiment of the present invention.

Please add the following new paragraph on page 11, after line 10:

FIG. 6 is a cross-sectional view of an organic EL display device according to an exemplary embodiment of the present invention. Referring to FIG. 6, an inorganic protection layer 17 is disposed on the second electrode of the organic EL portion 12.
